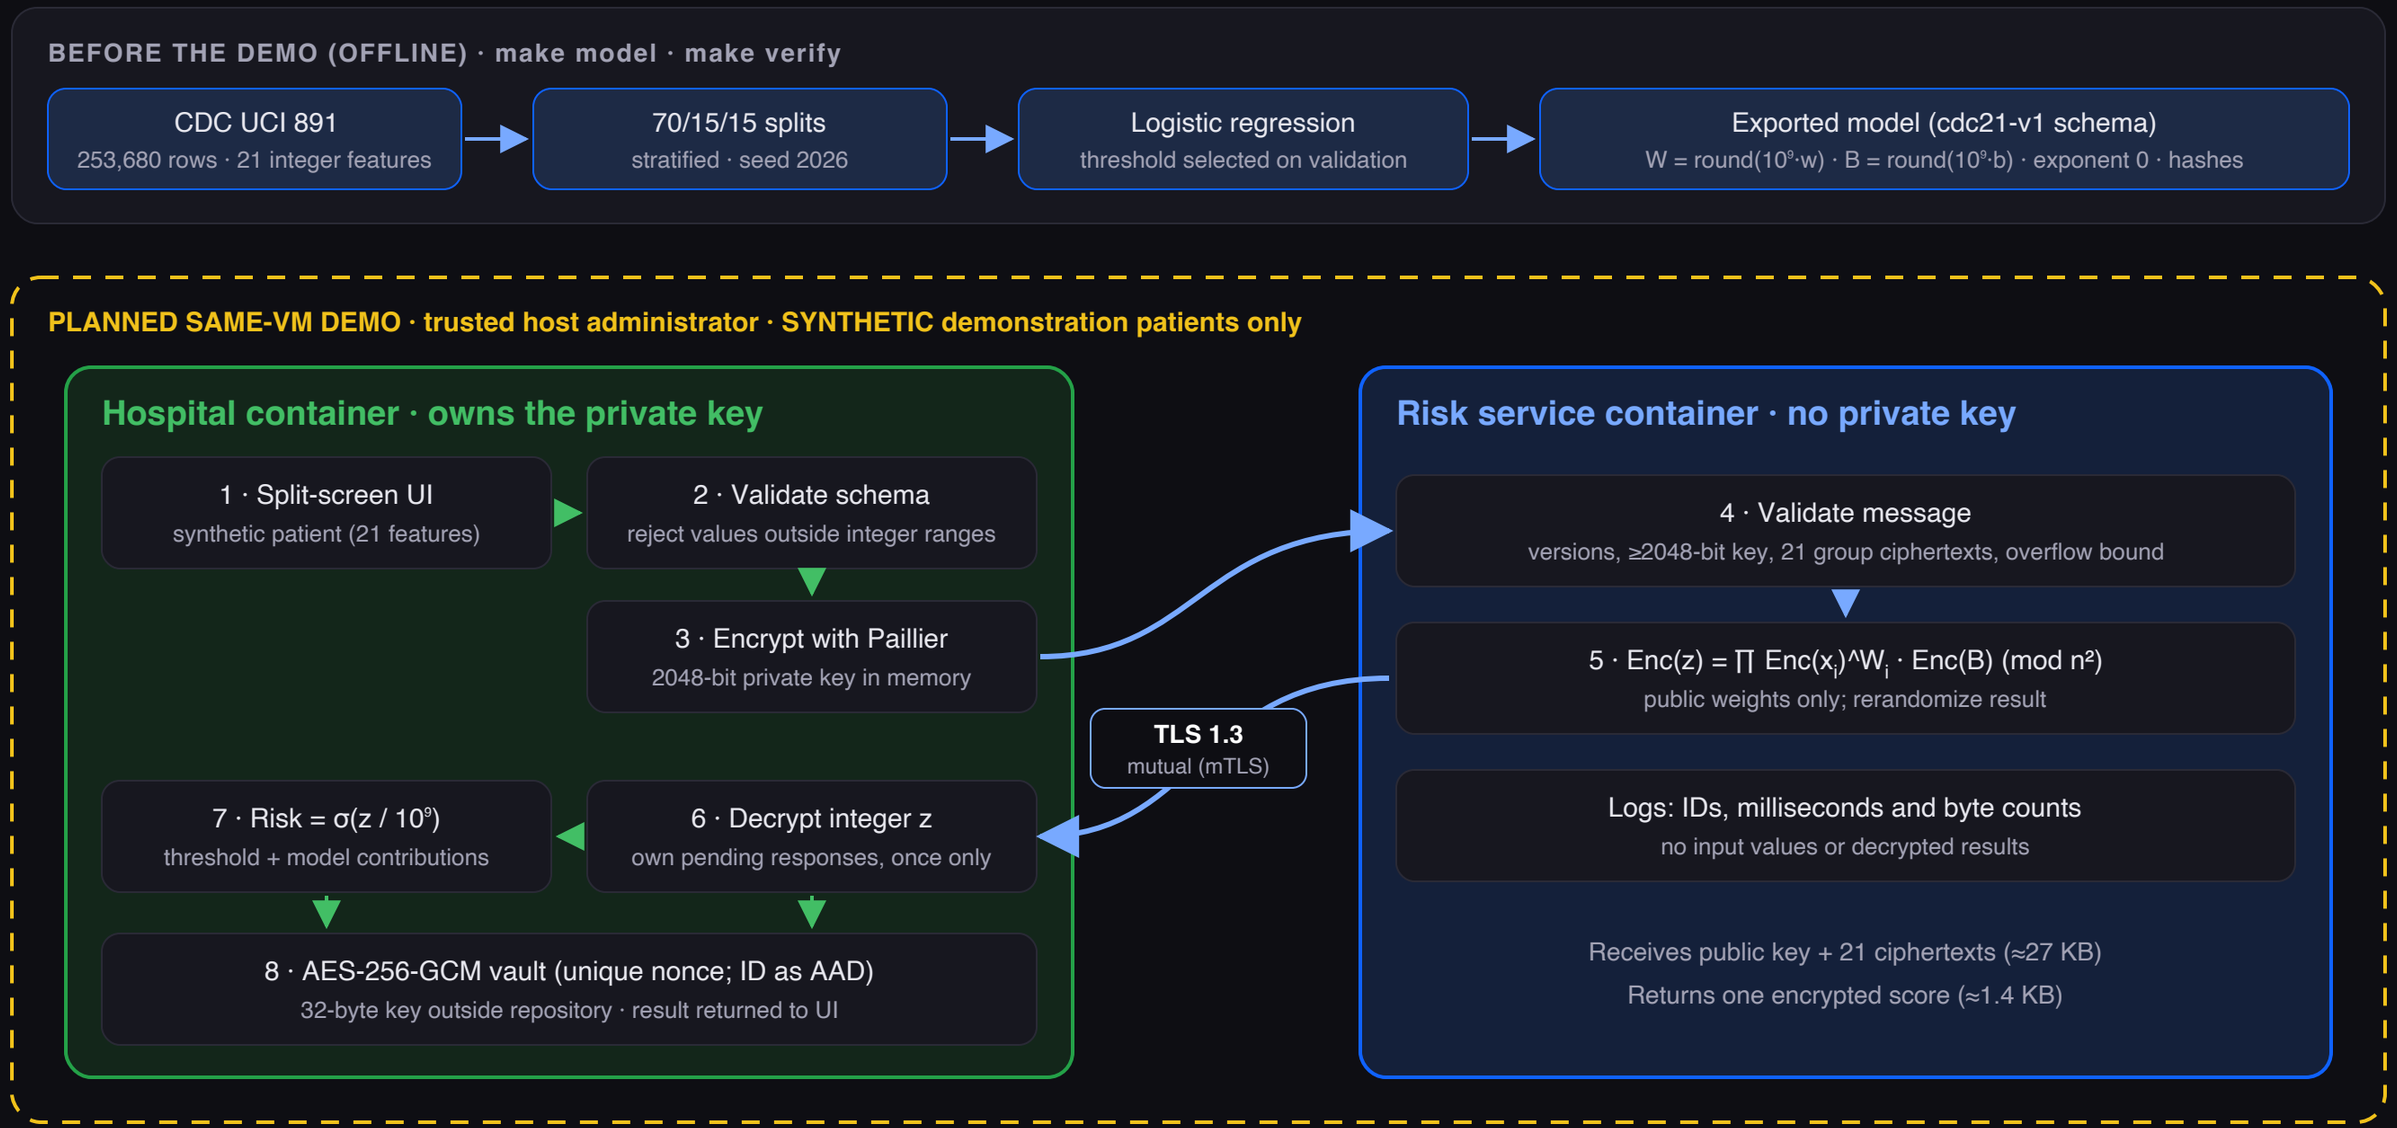
Privacy-preserving screening · implemented flow

Los Antimarrulla · IBM Z Datathon 2026 · src/screening/ · verified locally; LinuxONE s390x run pending



Tests: decrypted integer equals the reference · floating-point logit error ≤ 1.03×10^{-7} · negatives, zeros, extremes, invalid inputs · export/reload · no private key at the service · no patient data in operational service logs.

Screening support, not diagnosis. ENSANUT and E5 are separate exploratory extras; Granite and CKKS are not implemented.
